

Govern. Enforce. Prove.

Finally, a compliance system that closes the loop.

ClearAlign Turns Policy Into Proof Without The Chaos Of
Spreadsheets, Versioning Confusion, Or Scattered Evidence.

The New Risk Reality.

You Don't Lack Policies. You Lack Proof.

Enterprise risk today moves faster than your compliance workflows.

Policies evolve monthly.

New AI and cloud risks show up weekly.

Audit asks still land in your inbox like it's 2015.

You've got Word docs, versioning confusion, and evidence scattered across tools and teams. Meanwhile, regulators want proof. Now.

ClearAlign is the system that turns policy into evidence—without the overhead.

What ClearAlign Does.

Define it. Enforce it. Prove it.

ClearAlign connects your governance intent to operational reality—and documents every step.

Module	Purpose	What It Does
Govern	Define and manage internal policies	Structured policy builder with version control and role mapping
Enforce	Operationalize with clarity	Control assignments, automated checks, real-time enforcement logic
Prove	Build the audit trail automatically	Tag and map evidence, close control gaps, export anytime

Everything connects. Nothing falls through.

Intelligence That Works for You.

We're Not Layering AI For Buzz. We Use It Where It Solves Real Problems:

-  Auto-map controls to policies and regulations.
-  Detect policy gaps before your auditors do.
-  Tag unstructured evidence without manual lift.
-  Version-aware semantic diffing on policies.

AI-backed where it matters. Invisible where it doesn't.

Why ClearAlign Is Different.

✔ What You Get	✗ What You Leave Behind
A live system of record for compliance	Static documents, stale trackers
Operational controls with real enforcement	Passive checklists, post-hoc reviews
Mapped proof, not just intent	Manual audit prep, spreadsheet fatigue
Regulatory mapping built in	Googling your way through MAS and NIST

This isn't another form builder or GRC dashboard.

ClearAlign is the compliance execution layer—for teams that don't have time to chase evidence.

Who It's For?

Gain full control and visibility without increasing headcount.

CISOs

Move from static reports to live, actionable compliance assurance.

Risk Officers

Scaling Enterprises

Confidently govern AI, cloud, and regulated products across jurisdictions.

Compliance Leaders

Stay audit-ready with real-time evidence and clause-level traceability.

Join the Prelaunch Cohort.

We're Inviting A Select Group Of Early Adopters Before Public Release.

What You Get?

1

Early access to the platform

2

Influence over roadmap and integrations

3

Direct access to our founding team

4

A head start on the future of governance

ClearAlign

Govern. Enforce. Prove.

**Built For Teams Who Don't
Have Time To Chase Proof.**
